Art Unit: 2653

1. In view of applicant's response to the first office action the following restriction requirement is made because the nature and scope of the invention, as now indicated, is of such an extent as to require the separation of the different inventions for a complete and proper examination.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I; Claims 12-13 are drawn to a combination magnetic disk drive utilizing a piezo actuator, classified in Class 360, subclass 294.4.

Group II; Claims 1-11 are drawn to a subcombination piezo actuator, classified in Class 977, digest 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by

itself or in other combinations. See MPEP § 806.05(c). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because other types of parallel piezo actuators which are coupled together via a coupling mechanism are available for use in the piezo actuators of disc drive systems. The subcombination has separate utility such as in other types of MEMS devices such as in force scanning probe microscopes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and require divergent fields of search, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr.R.M. Farid on 22 June 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ whose telephone number is (571) 272-7587. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM KORZUCH can be reached on (571) 272-7589. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
